**RADIA ESTABLISHES FIVE-YEAR LEGACY GIFT TO COMMUNITY  
HEALTH CLINICS**

**Everett, Wash.** – In celebration of its ten years in business, Radia’s Board of Directors has committed \$50,000 over the next five years to support the Community Health Clinics in its service areas in Washington state.

The five-year gift will be distributed to eight community clinics including the International Community Health Services in Seattle, Community Health Centers of Snohomish County, Bothell-Kenmore Community Health Center, Whidbey Community Clinics, Eastside Community Health Center in Redmond, Columbia Valley Community Health in Wenatchee, Country Doctor Community Health Centers in Seattle and Providence Everett Healthcare Clinic.

Says Jeffrey Robinson, MD, member of the Radia Board of Directors, “Radia has enjoyed a successful decade during which we have thrived because of hard work and good fortune. We want to mark our decade and share some of our success with those who may not be as fortunate. Community Health Clinics in our state ensure that all residents have access to quality health care and services regardless of their geographic location, nationality, income level or insurance status. This contribution will help the dedicated staff who serve those in need.” Notes Robinson, Radia does not provide professional services for any CHC clinic.

Says Linda McVeigh, Executive Director of Seattle’s Country Doctor Community Health Center, "Our funding often falls short of allowing us to meet the tremendous

need in our community. This gift will go far in helping us meet the challenges of caring for the growing number of uninsured and of achieving our mission - to improve the health of our diverse community.

Thank you, Radia!"
